## PHILIPPINE ARMY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

 For the Year Ended December 31, 2020
## 1. General Information/Agency Profile

The consolidated financial statements (FS) of the Philippine Army (PA) were authorized for issue on May 13, 2021 as shown in the Statement of Management Responsibility for Financial Statements signed by Lieutenant General Jose C Faustino Jr, Acting Commanding General of PA and Colonel Ramon Antonio E Bello, Assistant Chief of Staff for Financial Management, G10.

The PA was first established on 22 March 1897 during the first meeting at Tejeros, Cavite. Currently, PA operates under the authority of the Executive Order (EO) 292, s. 1987 "Instituting the Administrative Code of 1987". As embodied in EO 292, the PA shall be responsible for the conduct of operations on land, in coordination with other Major Services. Section 49 of the same EO enumerates the functions of the Army as follows: (1) organize, train and equip forces for the conduct of prompt and sustained operations on land; (2) prepare such units as may be necessary for the effective prosecution of the national defense plans and programs; (3) develop, in coordination with the other Major Services, tactics, techniques and equipment of interest to the Army for field operations; (4) organize, train and equip all reserve units; and (5) perform such functions as may be provided by law or assigned by higher authorities. The following are the program objectives by mission areas to be performed by the Army: Territorial Defense, Security and Stability (TDSS) and Force-Level Command and Control, Support and Training (FLC2ST).

The PA units with their corresponding servicing FAUs are as follows:

## 2. Statement of Compliance and Basis of Preparation of FS

The consolidated FS have been prepared in accordance with and comply with the International Public Sector Accounting Standards (IPSASs) pursuant to COA Resolution No. 2020-01 dated January 9, 2020.

The consolidated FS have been prepared based on historical cost, unless stated otherwise. The Statement of Cash Flows is prepared using the direct method.

## 3. Summary of Significant Accounting Policies

### 3.1 Basis of accounting

The consolidated FS are prepared on an accrual basis in accordance with the IPSASs.

### 3.2 Consolidation

The consolidated FS reflect the assets, liabilities, revenues, and expenses of the Headquarters and 36 PA Major Units.

### 3.3 Cash and cash equivalents

CCE comprise of cash on hand and cash in bank. Cash on hand pertains to unremitted collections through Collecting Officer, Finance Center, Philippine Army (PA) deposited with the Treasurer of the Philippines at the following year while cash in bank pertains to local currency current account and treasury deposits.

### 3.4 Inventories

Inventory is measured at cost upon initial recognition.
Per GAM, costs incurred in bringing each product to its present location and condition are accounted for, as follows:

- Raw materials: purchase cost using the weighted average cost method.
- Finished goods and work in progress: cost of direct materials and labor and a proportion of manufacturing overheads based on the normal operating capacity but excluding borrowing costs.

In the case of PA, it uses specific identification of costs method. Wherein, the cost of inventories of items which are not ordinarily interchangeable, and goods or services produced and segregated for specific projects are assigned by using the specific identification of their individual costs. Specific identification of costs means that specific costs are attributed to identified items of inventory.

Inventories are recognized as an expense when deployed for utilization or consumption in the ordinary course of operations of the PA.

### 3.5 Property, Plant and Equipment (PPE)

## Recognition

An item is recognized as PPE if it meets the characteristics and recognition criteria as a PPE.

The characteristics of PPE are as follows:

- tangible items;
- are held for use in the production or supply of goods or services, for rental to others, or for administrative purposes; and
- are expected to be used during more than one reporting period.
- An item of PPE is recognized as an asset if:
- It is probable that future economic benefits or service potential associated with the item will flow to the entity; and
- The cost or fair value (FV) of the item can be measured reliably.

## Measurement at Recognition

An item recognized as PPE is measured at cost.
A PPE acquired through non-exchange transaction is measured at its FV as at the date of acquisition.

The cost of the PPE is the cash price equivalent or, for PPE acquired through non-exchange transaction its cost is its FV as at recognition date.

Cost includes the following:

- Its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates;
- expenditure that is directly attributable to the acquisition of the items; and
- initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which an entity incurs either when the item is acquired, or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.
- PPE were reclassified to Semi-Expendable Property having a cost of below $£ 15,000.00$ per COA Circular Nr 2015-007.

## Measurement After Recognition

After recognition, all PPE are stated at cost less accumulated depreciation and impairment losses.

When significant parts of PPE are required to be replaced at intervals, the PA recognizes such parts as individual assets with specific useful lives and depreciates them accordingly. Likewise, when a major repair/replacement is done, its cost is recognized in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied.

All other repair and maintenance (RM) costs are recognized as expense in surplus or deficit as incurred.

## Depreciation

Each part of an item of PPE with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognized as expense unless it is included in the cost of another asset.

## Initial Recognition of Depreciation

Depreciation of an asset begins when it is available for use such as when it is in the location and condition necessary for it to be capable of operating in the manner intended by management.

For simplicity and to avoid proportionate computation, the depreciation is for one month if the PPE is available for use on or before the 15th of the month. However, if the PPE is available for use after the 15th of the month, depreciation is for the succeeding month.

## Depreciation Method

The straight-line method of depreciation is adopted.

## Estimated Useful Life

PA uses the Schedule on the Estimated Useful Life of PPE by classification prepared by COA under COA Circular Nr 2017-004 dated December 13, 2017. The agency is currently applying the useful life of 10 years in general, for buildings - 30 years, information and technology equipment -5 years, motor vehicles - 7 years and for military, police and security equipment - 10 years.

PA uses a residual value equivalent to at least five percent of the cost of the PPE.

## Impairment

An asset's carrying amount is written down to its recoverable amount, or recoverable service amount, if the asset's carrying amount is greater than its estimated recoverable service amount.

## Derecognition

PA derecognizes items of PPE and/or any significant part of an asset upon disposal or when no future economic benefits or service potential is expected from its continuing use. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the surplus or deficit when the asset is derecognized.

### 3.6 Intangible Assets

## Recognition and Measurement

Intangible assets are recognized when the items are identifiable nonmonetary assets without physical substance; it is probable that the expected future economic benefits or service potential that are attributable to the assets will flow to the entity; and the cost or FV of the assets can be measured reliably.

Intangible assets acquired separately are initially recognized at cost.
If payment for an intangible asset is deferred beyond normal credit terms, its cost is the cash price equivalent. The difference between this amount and the total payments is recognized as interest expense over the period of credit unless it is capitalized in accordance with the capitalization treatment permitted in PPSAS 5, Borrowing Costs

## Subsequent Measurement

The useful life of intangible assets is assessed as either finite or infinite. Intangible assets with a finite life is amortized over its useful life.

The straight line method is adopted in the amortization of the expected pattern of consumption of the expected future economic benefits or service potential.

An intangible asset with indefinite useful lives is not amortized. Intangible assets with an indefinite useful life or an intangible asset not yet available for use were assessed for impairment whenever there is an indication that the asset may be impaired.

The amortization period and amortization method for an intangible asset with a finite useful life were reviewed at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset were considered to modify the amortization period or method, as appropriate, and were treated as
changes in accounting estimates. The amortization expense on an intangible asset with a finite life is recognized in surplus or deficit as the expense category that is consistent with the nature of the intangible asset.

Gains or losses arising from derecognition of an intangible asset were measured as the difference between the net disposal proceeds and the carrying amount of the asset and were recognized in the surplus or deficit when the asset is derecognized.

### 3.7 Changes in accounting policies and estimates

PA recognizes the effects of changes in accounting policy retrospectively. The effects of changes in accounting policy were applied prospectively if retrospective application is impractical.

PA recognizes the effects of changes in accounting estimates prospectively by including in surplus or deficit.

PA corrects material prior period errors retrospectively in the first set of FS authorized for issue after their discovery by:

- Restating the comparative amounts for prior period(s) presented in which the error occurred; or
- If the error occurred before the earliest prior period presented, restating the opening balances of assets, liabilities and net assets/equity for the earliest prior period presented.

### 3.8 Budget information

The annual budget is prepared on a cash basis and is published in the government website.

A separate Statement of Comparison of Budget and Actual Amounts (SCBAA) was prepared since the budget and the FS were not prepared on comparable basis. The SCBAA was presented showing the original and final budget and the actual amounts on comparable basis to the budget. Explanatory comments are provided in the notes to the annual FS.

### 3.9 Adjustments on Accumulated Surplus

Fundamental errors of prior years are corrected by directly adjusting the Accumulated Surplus/(Deficit) account. Errors affecting current year's operations are charged to the current year's accounts.

| Total Service and Business Income | P89,888,171.53 | P 105,440,966.19 |

15.1 For previous years, Fines and Penalties - Service Income account arises from liquidated damages from suppliers and/or contractors on the delays of deliveries and/or completion of projects. However, for CY 2020, Miscellaneous Income was used instead to comply with the set example provided under GAM.
15.2 Other Service Income comprises of income derived from service fees from financial institutions, issuance of PA military/dependent identification cards and services rendered by dental dispensaries.
15.3 Rent/Lease Income pertains to collection of rentals from transient facilities and business establishments within the camp premises.
15.4 Hospital Fees consists of collection of fees for services rendered by Army General Hospital to outpatients and collection from Philhealth.

18.3.1 The Supplies and Material Expenses for CY 2020 pertain to inventory consumptions for the current year only. PY's consumptions recorded under the Accumulated Surplus account were restated to conform with the CY 2020 FS presentation. The unprecedented pandemic shifted the Army's focus in providing immediate supplies in response to the pandemic, prioritizing the necessary requirements of front-liners thereby, increasing medical and laboratory expenses, and other supplies and materials expenses, as well as office supplies expenses for the day-to-day operations of PA Offices.

### 18.4 Utility Expenses

| Accounts | $\mathbf{2 0 2 0}$ | 2019 As Restated |

| Total Communication Expenses | ¢ 141,721,456.05 | P 123,909,034.86 |

18.5.1 As the Command adapts to the new normal, a significant increase in Communication Expenses were reported. The increase was primarily due to the increased demand and usage rate in internet connection as a means of communication with other units. It can be gleaned that the operations of PA necessitate strong communication adding the challenge of connecting with geographically separated units. The
pandemic also necessitates a new modality of communication to address the barrier and stoppage of operational and administrative programs.
